Embody Principle as Practice

Can you take what you know and apply it to what you need? Follow the path to where knowledge and experience meet to create mastery!

By utilizing the key principle of trans-illumination, you will learn to see through a structure into an underlying pattern.

You can experience the fusion of principle with practice. M.E.D., interwoven with the *Modules* represents a trans-luminal language, whereby the person and the principle can be seen to be one and the same.

You will discover the harmonic interchange between the space of not-knowing and instant creative activity: Listen, Inspire, Apply!

What are the *Modules*?

We will be introducing and demonstrating the flowing language, which we have come to refer to as the *Modules*, which are the living geometric forms utilized in the HOLOSETS language. Modules are intelligent holographic software. Every color, angle and movement within these informational arrangements create intricate templates that function like lines and permutations of code that are designed to integrate with a person's holographic body, in order to perform specifically focused tasks and activities.
